TECHNOLOGIES

SMART SYSTEMS
ELECTRICITY DISTRIBUTION
EXHIBITION VENUES

CUBE ATTRIBUTES

CUBE designs and sells intelligent systems entirely dedicated to controlling electricity distribution in exhibition venues

Our strength, a triple expertise!

 **Engineering Expertise** - Auditing each client's professional environment

 **Production Expertise** - Conceiving, designing & installing innovative products and services

 **Process Management** - Mastering the entire process from customer order down to the power sockets

 **Reduce** set-up and dismantling time

 **Improve** the energy efficiency of sites and events

 **Offer** traceability of energy consumption

 **Create** new business opportunities

Our conviction, at the heart of today's competitive environment!

The mastery of smart data is the key to improving performance at exhibition venues

CUBE, as a long-standing pioneer and ground-breaker, integrates Research & Development in its company DNA. Our team therefore offers innovations that break with and revolutionize work environments in the events industry.

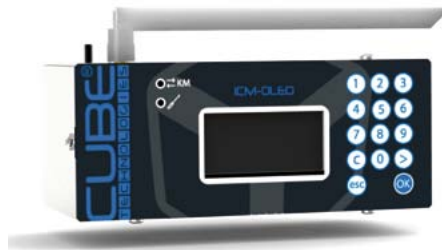

KEOPS EXPO PRINCIPLES

Our solutions are communicative, multi-purpose and evolutive

KEOPS EXPO associates intelligence dedicated to measurements, metering and communication functions with traditional equipment (power sockets and circuit breakers) via control and supervision software.

 Traditional components

 Intelligent electronics

 Professional software

KEOPS EXPO FUNCTIONS

Key functions available in all KEOPS EXPO products

Electronic calibration

Calibrate and fine-tune at any time the electric power delivered to exhibitors through KEOPS MANAGER software.

Controlled power cuts

Automatic power cuts at night to save energy, due to administrative needs (e.g non-payment, overconsumption, etc.) or for security reasons (faulty grounding, faulty phasing).

Supervision of terminals

Supervision in real time of the operating state of each KEOPS EXPO terminal.
Access to historical data and electricity consumption during and after each event.

KEOPS EXPO PRODUCTS

4 ranges of smart products designed specifically for the events industry

KEOPS ONE

High performance terminal

KEOPS MULTI

Terminal with multiple outlets

KEELIPSE

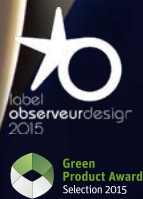

Revolutionary terminal for shell scheme stands

KEOPS INFRA

Custom-made solutions to control infrastructure equipments

KEOPS EXPO OFFERS

KEOPS Manager, always one step in advance

KEOPS MANAGER is a professional software dedicated to the implementation and follow-up of electricity connections on stands.

CUBE proposes 3 offers that are 100% compatible!

CUBE EASY

CUBE EASY, manage each terminal individually

CUBE EASY integrates 3 basic functions : controlled power cuts, electronic calibration and proximity supervision of the terminal, all managed directly by mobile devices.

With CUBE EASY, you are immediately operational!

CUBE CONNECT

CUBE CONNECT, remote supervision of all terminals

Besides having CUBE EASY's functions, CUBE CONNECT provides control and global supervision of all KEOPS terminals.

With CUBE CONNECT, all the terminals at your fingertips!

CUBE INTERACTIVE

CUBE INTERACTIVE for overall, automatic management of electricity distribution

CUBE INTERACTIVE, based on our professional software, offers multiple tools including the automatic synchronization between KEOPS terminals and exhibitor orders.

With CUBE INTERACTIVE, project yourself into a high-performing world!

CUBE COMMITMENTS

Eco-conception of products and services to minimize the event industry's carbon footprint

Our priority, mastering the production chain!

CUBE manufactures its products locally, as close as possible to its clients. Quality control is ensured through internal company procedures that also apply to each of our sub-contractors.

Our promise, sustainable solutions!

CUBE continually improves the embedded technologies in its products. KEOPS EXPO's previous terminals are constantly updated to guarantee their compatibility with future generations of CUBE solutions.
